

Procurement Notice – High Efficiency Water System Retro-fit for Ice Rink Applications: Park City Municipal Corporation (PCMC) is seeking a proposal for a retrofit design and implementation of the proposed system which will eliminate the current water heating system inefficiencies. Select to review complete RFP. A scheduled visit will be required to conduct an evaluation of the current water heating and delivery system. It is required that the design plan includes retaining a portion of the existing equipment to preserve resulting redundancies. The equipment replacement plan requires a 95% AFUE Efficiency systems and includes isolating and indirectly heating the filtered water. One portion of the design will require a heat exchange system with glycol compatible waterways to access free heat capture technology to supplement indirect water heating. For additional questions and to schedule a site visit contact via email: Chanz Skeffington (cskeffington@parkcity.org), PCMC Operations Assistant, Park City Ice Arena, 600 Gillmor Way, Park City, UT, 84060.

It is required that the proposal includes the following:

1. Plans for a retrofit design based on site visit
2. Detailed information of recommended equipment
3. Equipment costs for proposed design
4. Material and labor costs for the implementation of the new system
5. Proposal adheres to RFP criteria

PCMC is requiring a warranty on all labor and equipment of at least one year and a price that includes labor and detailed pricing for recommended equipment. The proposal should include final system product support, repair and replacement service rates subsequent to warranty expiration. Only bids received from licensed and insured professional entities under state and federal law will be considered.

Qualified firms must schedule a site visit and present a proposal by **February 27th, 2014** in order to be considered for this project. PCMC reserves the right to reject all offers and cancel this project at any time and for any reason.
