I. Introduction

Park City is a mountain resort community located in Summit County, Utah. Founded in 1884 as a silver mining town, Park City is home to world class ski areas and a downtown National Register Historic District. Park City has a year round population of approximately 8,000 people, yet requires infrastructure and City services for five times its population due its tourism driven economy.

The Park City Municipal Corporation (PCMC) desires to offer greater transparency to its citizens and is seeking proposals from meeting management software providers to incorporate meeting management software capable of online video (live and on-demand), audio, and agenda and minutes tracking tools for the public and staff to facilitate the weekly legislative (Council) meetings. The software solution should be all encompassing, allowing internal users and the public with easier access to agenda items and meeting minutes (before, during, and after) by utilizing an interactive web-based and mobile platforms of written, video and audio tracking.

II. Scope of Project

Project Description:

Implement a meeting management software solution to improve public participation and transparency in the legislative process, as well as provide internal staff with a more efficient and effective internal workflow system that leverages new technologies.

Scope of Project:

Purchase and implement a meeting management software solution from a qualified vendor that specializes in the field of government/public meeting documentation and record keeping, while at the same time maintaining a high focus on efficiency, accessibility, and transparency.

Once selected, the chosen vendor is expected to coordinate meetings with City staff to refine and tailor the software solution to meet PCMC's unique needs and facilitate a smooth implementation process. The working committee will include staff from the Executive, Legal, Communications, and IT Department.

Deliverables:

The system shall include, but not be limited to (in no particular order), accomplishing the following primary goals:

- Complete analysis of PCMC's public meeting preparation and presentation processes (internal and external factors).
- A point and click, web-based solution that conforms and enhances PCMC's current meeting management processes, as well as integration with the City's current website and /or future iterations.
- Provides real-time streaming audio and visual of meetings in process.
- Provides access to and the capability to playback previous meetings' agenda items in both audio and visual.

- Provides an orderly and effective storage solution for audio and visual recordings that are easily accessible to the general public and staff.
- Identifies additional areas for improving PCMC's current workflow process, including areas of efficiency, public access, and transparency.
- Provides a centralized approach to compiling/building multiple council/committee agendas, such as other committees and commissions.
- Provides the capability to submit agenda items via an internal workflow platform, including large document and files as attachments.
- Provides the capability of workflows to sequentially route Council reports, by-laws, and agenda items for review by multiple users from different departments (for example, a chronological review by departments).
- Provides secure electronic signature for the approval of Council reports, by-laws, and agenda items.
- Provides the capability to search agendas, minutes, reports, by-laws and agenda items by staff and the public.
- Provides the capability to prepare meeting minutes and agendas electronically, as well as notify elected officials, staff, and the public when the information is publicly available.
- Provides capability to view and edit final agenda online, print, or copy to external media.
- Provides varied levels of access to the system as defined by user (i.e. administrator, contributor, member of Council/Committee).
- Meet the accessibility requirements set forth in the Americans with Disabilities Act (ADA), as amended.
- Be functionally rich in capabilities to automate agenda preparation, manage legislative history, and enhance document workflows and deadline (such as providing users with reminders that review is necessary by set deadlines).
- Provides excellent intra-department and user security controls.
- Provides the ability to create and store images of documents using non-proprietary image formats.
- Limited proprietary components.
- Link agendas items and minutes to indexed web stream of audio/visual content.
- The proposed solution must be of an expandable design readily able to incorporate additional enhancements in the future. It should be developed, tested, and maintained using a high-quality software development methodology for long-term reliability and technical efficiency.
- Provides a cost breakdown for the potential to phase-in roll-out (i.e., begin with audio and internal workflow; subsequently expand to video at a later date).
