Furthermore, the City shall have the right to waive any informality or technicality in proposals received when in the best interest of the City.

I. Introduction

The Park City Water Department utilizes two hard rock mine drain tunnels, the Judge and Spiro, as drinking water sources. In order to ensure the tunnel flows retain their current quality and volume, Park City is soliciting proposals for performing condition assessments of the Judge Tunnel, Spiro Tunnel and related side drifts and shafts. Park City desires to identify current stability issues, recommended remediation and prioritization of needed repairs, and any recommended site improvements such as additional safe zones, lighting or forced air. We also would like an evaluation of our current work/safety practices and our mine maintenance program.

II. Scope of Project

The project consists of the following main tasks:

1. Inspect both tunnels and associated side drifts and shafts for stability. Evaluate condition of timbers, lagging, steel sets, rails, sills and runners. Document conditions including pictures based on footage from portals. Rate each need with respect to priority.
2. Inspect the bulkhead inside the Spiro Tunnel for stability and general structural condition. Evaluate how long the structure may last and potential effects of removing it such as the release of built up sediment. Provide recommendations for remediation of deficiencies.
3. Inspect the Thaynes and Daly West shafts at the surface for stability and timber support effectiveness. Ascertain whether the shafts can be relied upon long term to provide fresh air for the tunnels.
4. Identify major water inflow locations in each tunnel and potential surface area contributions to major inflows.
5. Identify costs associated with recommended work.
6. Provide a review of current worksite safety and best practices. Evaluate whether changes and/or improvements should be made.
7. Evaluate the scope of our current mine maintenance program and evaluate whether changes and/or improvements should be made considering proposed future treatment of both Tunnel flows.

Deliverables - Hardcopy and digital copies of all work products, technical memoranda, etc. and the following:

- Report including maps and locations of existing conditions and recommended remediation, as well as suggested improvements to our maintenance and safety programs.

Data Provided by City or Anticipated City Action - The City will furnish the following data:

- Maps of the mine tunnels and shafts including distances from portals, side drifts and other features.

- Other available data that may be required to achieve the objectives of the project such as anticipated water flows in the tunnels.

III. Additional Information

Park City has access and maintenance agreements in both the Spiro and Judge Tunnels in order to maintain them to preserve water quality and volume. Currently we employ two employees part time to periodically inspect and provide direction on work prioritization on a regular basis. Park City also contracts with a neighboring utility, Jordanelle Special Service District, to provide labor for the maintenance of the tunnels.

Both tunnels are very wet in nature and have electric mine cart access to the end of the areas included in the scope of this project. There is no power or lighting beyond the first few hundred feet of either tunnel. Ventilation in the tunnels is provided by natural airflow from vertical shafts.

The Judge Tunnel consists of 9800' of main tunnel approximately ten feet wide, along with a 1500' side drift to the Daly West shaft. There is generally between 600 and 1500 gpm of water flowing along the tunnel floor.

The Spiro Tunnel consists of 13,650' of main tunnel, along with a 350' secondary entrance and an 800' side drift to the Thaynes shaft. It also contains a bulkhead at the 13,650' mark which allows water to pool and collect behind it before it is sent through a pipeline to the tunnel entrance. There is generally around 3,000 gpm flowing along the tunnel floor. There is also a 12" pipe running the length of the tunnel.

IV. Content of Proposal

Proposals will be evaluated on the criteria listed below. Proposals shall be limited to ten (10) pages.

The interview will consist of a presentation of the firm's qualifications for the job, experience on similar projects, explanation of any ideas the firm has that may have a bearing on overall project cost or schedule and a question/answer period. Each firm's proposed key project staff shall attend the interview. Each firm shall be responsible for all costs (e.g. travel and presentation materials) related to the presentation.

Park City Municipal Corporation reserves the right to reject any and all proposals for any reason. Proposals lacking required information will not be considered.
