1. Item number 1 of section III in the RFP, it states that the Contractor will describe their technology plan for accepting automated credit card payments. In the past, the city has provided portable credit card machines that would deposit directly into the city account. Under the new contract, would the contractor now have to provide their own portable credit card equipment for event parking or would the city still be able to provide their equipment for events?

- The city is seeking a contractor who would be able to provide portable credit card machines for these events. The need for this equipment is pending council approval for each event.
