Subject: NYTimes: The End of Snow?

Dear Park City Planning Commission and Department.

Please read this article. It is ridiculous to be thinking about approving and building Treasure Hill. In addition to all the valid arguments clearly stated by so many people against this development I believe climate change must also be part of the argument against Treasure Hill. Scientists predict snow levels in Park City will dwindle and disappear over the next few decades. We cannot hide our heads in the sand any longer. This is the future and building Treasure Hill makes no sense especially because there will be no snow on the ski runs. It doesn't make any sense to me.

Thank you very much,
Rich Wyman

Here's a story from The New York Times that I thought you'd find interesting:

Nothing besides a national policy shift on how we create and consume energy will keep our mountains white.
