Ordinance No. 95-65

AN ORDINANCE AMENDING CHAPTERS 1, 2, 7, 8 AND 13 OF THE LAND MANAGEMENT CODE RELATING TO BUILDING HEIGHT, SNOW SHEDDING, SETBACKS, GARAGES/PARKING, NOTIFICATION TO ADJACENT PROPERTY OWNERS, AND FLOOR AREA RATIOS IN THE HISTORIC RESIDENTIAL (HR-1) AND HISTORIC RESIDENTIAL DEVELOPMENT LOW-DENSITY (HRL) DISTRICTS IN PARK CITY, UTAH

WHEREAS, protecting the health and safety and preserving the historic integrity in residential areas of the Historic District are values of the community and identified goals of the City Council; and

WHEREAS, the City Council enacted amendments to the Land Management Code dealing with height and floor area ratios in February 1995, but further directed staff, the Historic District Commission, and Planning Commission to explore solutions to mitigate the mass and scale of new development in the Historic District and to develop regulations to ensure compatibility with existing historic structures; and

WHEREAS, consistent with Council direction, public meetings were held with local architects, the Historic District Commission, and the Planning Commission. After several months of public meetings, on October 16, 1995, the Historic District rendered a positive recommendation to the City Council. Following public meetings, and a duly advertised public hearing held on October 25, 1995, the Planning Commission also rendered a positive recommendation to Council; and

WHEREAS, the City Council held public hearings at its regularly scheduled meetings on November 9, 1995 and December 7, 1995 and in consideration of the recommendations of the Historic District Commission, the Planning Commission and public testimony, finds it in the best interest of the residents of Park City, Utah to amend the Land Management Code with regulations that maintain the essence of the Historic District while safeguarding quality of life for its residents;

NOW, THEREFORE, BE IT ORDAINED by the City Council of Park City, Utah that:

SECTION 1. AMENDMENT TO CHAPTERS 1 OF THE LAND MANAGEMENT CODE. With regard to historic district design review and notification, Chapter 1 is hereby amended as follows:

HISTORIC DISTRICT DESIGN REVIEW AND NOTIFICATION:

Section 1.11--General Provisions/Procedures: Permitted Use Review Process

Permitted Use Review Process: On any proposal to construct a building or other improvement to property which is defined by this Code as a permitted use in the zone in which the building is proposed, the Community Development Department shall review the submission to determine whether the proposal (a.) is a permitted use within the zone for which it is proposed, (b.) complies with the requirements of that zone for building height, setback, front, side, and rear yards, and lot coverage; (c.) that the applicable parking requirements have been satisfied; and (d.) the plan conforms to the Park City Architectural Design Guidelines, the Historic District Design Guidelines, and architectural review process established for that zone. Upon finding that the proposal complies with the applicable zoning requirements, and can be adequately serviced by roads, existing utility systems or lines, the plans shall be reviewed for Building Code compliance and permit issuance procedures . If the submission does not comply with the requirements of the zone, the Community Development Department shall so notify the owner of the project or his agent, if any, stating specifically what requirements of the zone have not been satisfied, and also stating whether the project could be reviewed as submitted as a conditional use for that zone.

SECTION 2. AMENDMENTS TO CHAPTER 2 OF THE LAND MANAGEMENT CODE. With regard to the definition of height, Chapter 2 is hereby amended as follows:

BUILDING HEIGHT:

Chapter 2: Definitions

Height: The vertical distance from natural undisturbed grade to the highest point of a flat roof or to the deck line of a mansard roof or to a point midway between the lowest part of the eaves or cornice and ridge of a hip roof. In no case shall a mansard roof or the parapet wall of a flat roof extend more than 18" above the deck line or maximum zone height, whichever is lower. Roofs not fitting clearly any of the above three classifications shall be classified by the ~~Planning~~ Community Development Department in accordance with the roof it most clearly resembles. Roofs which drain to the center shall be considered as flat or mansard depending on their configuration.

In the HR-1 and HR-L zones, height shall be defined as the vertical distance from natural undisturbed grade or final grade (which ever yields the smaller\shorter building) at a point measured three feet out from the foundation wall to the highest point of a flat roof or to the deck line of a mansard roof or to the highest ridge of a hip or gable roof. In no case shall a mansard roof or the parapet wall of a flat roof extend more than 18" above the deck line. Roofs not clearly fitting any of the above three classifications shall be classified by the Community Development Department in accordance with the roof classification it most

clearly resembles. Roofs which drain to the center shall be considered as flat or mansard depending on their configuration. See Section 8.17.

SECTION 3. AMENDMENTS TO CHAPTER 7 OF THE LAND MANAGEMENT CODE. With regard to building height, snow shedding, setbacks, garages/parking, and floor area ratios, Chapter 7 is hereby amended as follows:

A. BUILDING HEIGHT

Chapter 7: Historic Residential (HR-1) District

Section 7.1.5--Building Height

a. Structures shall be erected to a height no greater than ~~28~~ 27 feet, as defined in Section 8.17. *(See Historic District Design Guidelines for additional design criteria.)* ~~No volume or area above this 28 foot height may be used for facade variation open space~~.

~~b. Downhill facades may not exceed 28 feet from natural or final grade (whichever is more restrictive) to the peak of the roof. The design of the structure must incorporate a significant facade shift after the 28 foot limit to break up the mass of the structure as viewed from public rights-of-way or properties below. The length of the facade shift should be in proportion to the building mass and may be roughly equal to the difference between natural and final grade at the base of the downhill facade. However, in order to avoid dictating design, no absolute standard for the size of the shift is specified. Rather the Historic District Commission shall review the facade shift during normal design review and may approve lesser or require greater shifts based upon neighborhood compatibility, visibility from public rights-of-way, and other design considerations.~~

Section 7. 14: Historic Residential Development Low-Density

Section 7. 14. 3.g--Building Height

(1) Buildings shall not exceed a maximum height of ~~28~~ 27 feet, ~~except as provided in the supplemental regulations~~ as defined in Section 8.17. *(See Historic District Design Guidelines for additional design criteria.)* ~~No volume or area above this 28 foot height may be used for facade variation open space~~.

~~(2) Downhill facades may not exceed 28 feet from natural or final grade (whichever is more restrictive) to the peak of the roof. The design of the structure must incorporate a significant facade shift after the 28 foot limit to break up the mass of the structure as viewed from public rights-of-way or properties below. The length of the facade~~

~~shift should be in proportion to the building mass and may be roughly equal to the difference between natural and final grade at the base of the downhill facade. However, in order to avoid dictating design, no absolute standard for the size of the shift is specified. Rather the Historic District Commission shall review the facade shift during normal design review and may approve lesser or require greater shifts based upon neighborhood compatibility, visibility from public rights-of-way, and other design considerations.~~

For structures on parcels greater than 76 feet total width, the side setbacks must be a minimum of ten feet each.

1. A side yard shall not be required between structures designed with a common wall on a lot line. The longest dimension of buildings thus joined shall not exceed 50 feet.

2. For side yards of less than five feet, the special side yard exceptions as provided in Section 8.14 shall not apply, except for projections of less than four inches as specified in Section 8.14(a) and for the allowance for a driveway as specified in Section 8.14 (h).

3. On corner lots, any yard which faces on a street for both main and accessory buildings shall not be less than 10 feet.

line, the total yard side setbacks must be a minimum of 15 feet with a minimum of five feet on one side. For structures on parcels greater than 76 feet wide at the front property line, the side yard setbacks must be a minimum of ten feet each. When the proposed plans for new residential construction and/or exterior remodeling (excluding decks or stairs) are determined by the Community Development Department to comply with the Historic District Design Guidelines, the subject property shall be posted by the Community Development Department and written notice shall be sent to property owners immediately adjacent to the property *(properties directly abutting and across public streets and/or rights-of-way)* by the Community Development Department. The notice shall state that the Community Development Department staff has made a preliminary determination that the proposed plans are in compliance with the Historic District Design Guidelines. The property posting and

written notice shall include, but are not limited to, the location and description of the proposed project and will establish a ten (10) day period in which the staff's preliminary determination of compliance may be appealed. Appeals by the applicant or public of departmental actions on architectural compliance ~~are~~ shall be heard by the Historic District Commission. Appeals shall be by letter or petition and shall contain the name, address, and telephone number of the petitioner, his or her relationship to the project or subject property, reason for requesting the review, and must be received by the Community Development Department within ten days from the date of the notice. Property within this zone may be subject to subdivision regulations and covenants that regulate design, materials, yard and height more strictly than this Code. This Code does not supersede more restrictive provisions in private covenants.

In addition, no structure within the zone may be painted or repainted without review and approval of the exterior color scheme by the Community Development Department.

Section 7.14.4--Historic Residential Development Low-Density: Architectural Review

Architectural Review: Prior to the issuance of a building permits for any conditional or permitted uses within this zone, the Community Development Department shall review the proposed plans for compliance with ~~the architectural design guidelines prepared by the~~ Historic District ~~Commission~~ Design Guidelines and adopted by resolution of the City Council as a supplement to this ordinance. The property posting and written notice shall include, but are not limited to, the location and description of the proposed project and will establish a ten (10) day period in which the staff's preliminary determination of compliance may be appealed. Appeals by the applicant or public of departmental actions on architectural compliance ~~are~~ shall be heard by the Historic District Commission. Appeals shall be by letter or petition and shall contain the name, address, and telephone number of the petitioner, his or her relationship to the project or subject property, and reason for requesting the review and must be received by the Community Development Department within ten calendar days from the date of the notice. The appeal shall be limited to the specific provisions of this Code that are violated by the action taken.

Property within this zone may be subject to subdivision regulations and covenants that regulate design, materials, yard and height more strictly than this Code. This Code does not supersede more restrictive provisions in private covenants.

In addition, no structure within the zone may be painted or repainted without review and approval of the exterior color scheme by the Community Development Department.

D. GARAGES/PARKING

7.1.4. SPECIAL PARKING REGULATIONS.

(a) Tandem parking is permitted for single family and duplex dwellings in the Historic District.

(b) To encourage the location of parking in the rear, common driveways may be permitted along shared side yard property lines where those drives provide access to parking in the rear of the main building. Restrictions on the deeds to both properties must provide for the preservation of such a shared drive.

(c) Common parking facilities may be permitted, upon approval of the Planning Department, where such a grouping may facilitate the development of individual buildings that more closely conform to the scale of historic structures in the district as defined in the design guidelines. Parking structures may be permitted, provided that the structure maintains all yard setbacks above grade, but may occupy below grade side yard areas between participating developments.

~~(d) In order to minimize the amount of hard-surfaced paving in front yards, the following limits on the widths of paved areas for driveways and exposed parking that are visible from the street shall apply:~~

~~1. For a single family dwelling on a 25-foot wide lot, the total area of hard surface for drive and parking shall not exceed 12 feet in width. The balance of any parking area or drive area shall be made of porous paving material. Drives shared with adjoining properties shall not exceed 35 feet in total width, regardless of placement on the lots involved.~~

~~2. For all other buildings, the total drive area shall not exceed 27 feet in width for hard surfaced drive and parking area, with additional parking and drive area provided with porous paving material. This hard surfaced width may be divided into separate drives, or in a single drive.~~

~~3. Garage door openings in single family structures on 25 foot lots shall not exceed 10 feet in width. On single lots that are more than 25 feet, but less than 37.5 feet in frontage width, the garage door openings shall not exceed 16 feet in width. Duplex~~

~~structures on 50 foot or wider lots may have one garage door opening (or combination of openings) totaling 18 feet in width for each unit of the duplex, or a total of 36 feet in width for the structure. Triplex structures, which are required to have a common underground parking area, shall have only one garage door opening, which shall not exceed 18 feet. Where garage door openings appear on a facade that does not face a street, so the garage is accessed from a common drive between adjoining properties, the Community Development Department may waive the maximum door width if necessary to make the common drive arrangement function.~~

(e) It is the City's policy to consider allowing a portion of the length of a code required parking stall to be placed within the City right-of-way, subject to the City Engineer's approval. The City Engineer shall consider the likelihood of future roadway changes, utilities, and any other health/safety considerations which may render parking in the right-of-way unacceptable.

E. FLOOR AREA RATIOS (FAR)

Section 7.1.3(b)-- Floor Area Ratio

(b) ~~Floor Area Ratio. The floor area of all new structures constructed within the HR-1 District shall be limited by the Floor Area Ratio (FAR) which shall be the Floor Area as defined in Chapter 2, divided by the total area of the lot or parcel. For lots up to 1875 square feet, the maximum FAR shall be .9. For parcels of 1876 square feet or larger, the floor area ratio is equivalent to the maximum floor area for the first 1875 square feet (1687 square feet), plus 30% of additional lot square footage.~~

Floor Area Ratio. For lots 1,874 sq. ft. feet and smaller, the maximum floor area shall be no greater than 1,687 square feet within the HR-1 Zone. The floor area of all new structures constructed within the HR-1 District on lots greater than 1,875 square feet shall be limited by the Floor Area Ratio (FAR) which shall be the Floor Area as defined in Chapter 2, divided by the total area of the lot or parcel. For lots greater than 1,875 sq. ft., the floor area ratio shall be .9 for the first 1,875 sq. ft., plus 30% of the additional lot square footage. The maximum square footage is calculated by the following formula:

MAXIMUM FLOOR AREA = 1687 + (.30 X (Parcel Size - 1875))

Section 7.14.3(b)

(b) ~~Floor Area Ratio. The floor area of all new structures constructed within the HRL District shall be limited by the Floor Area Ratio (FAR) which shall be the Floor Area as defined in Chapter 2, divided by the total area of the lot or parcel. For lots up to 1875 square feet, the maximum FAR shall be .9. For parcels of 1876 square feet or larger, the floor area ratio is equivalent to the maximum floor area for the first 1875 square feet (1687 square feet), plus 30% of additional lot square footage.~~

Floor Area Ratio. For lots 25 feet x 75 feet and smaller, the maximum floor area shall be no greater than 1,687 square feet within the HRL Zone. The floor area of all new structures constructed within the HRL Zone on lots greater than 25 feet x 75 feet (1,875 square feet) shall be limited by the Floor Area Ratio (FAR) which shall be the Floor Area as defined in Chapter 2, divided by the total area of the lot or parcel. For lots greater than 25 feet x 75 feet (1875 sq. ft.), the floor area ratio shall be .9 for the first 1875 sq. ft., plus 30% of the additional lot square footage. The maximum square footage is calculated by the following formula:

MAXIMUM FLOOR AREA = 1687 + (.30 X (Parcel Size - 1875))

SECTION 4. AMENDMENTS TO CHAPTER 8 OF THE LAND MANAGEMENT CODE. With regard to measuring height, Chapter 8 is hereby amended as follows:

BUILDING HEIGHT:

Chapter 8. Supplementary Regulations

Section 8.17--Height Provisions

The total height of the building shall be measured as the vertical distance from natural grade or final grade (whichever yields the smaller\shorter building) at a point three feet out from the foundation wall, as defined in this Code, to the highest point of a flat roof or to the deck line of a mansard roof or to ~~a point midway between the lowest part of the eaves or cornice and~~ the highest ridge of a hip or gable roof. In no case shall a mansard roof or the parapet wall of a flat roof extend more than 18" above the deck line ~~or maximum zone height, whichever is lower~~. Roofs not clearly fitting ~~clearly~~ any of the above three classifications shall be classified by the ~~Planning Director~~ Community Development Department in accordance with the roof classification it most ~~clearly~~ resembles. Roofs which drain to the center shall be considered as flat or mansard depending on their configuration. To allow for roof pitches and provide usable space within the Structure, the following exceptions apply:

~~a. The ridge of a gable, hip, gambrel or similarly pitched roof may extend up to five feet above the specifies maximum height limit for the zone.~~

~~b.~~ a. Antennas, chimneys, flues, vents, or similar structures may extend up to five feet above the specified maximum height limit for the zone.

~~c.~~ b. Water towers and mechanical equipment may extend up to five feet above the specified maximum height limit.

~~d.~~ c. Church spires, bell towers, ~~and like architectural features, as well as flag poles~~ flag poles, and like architectural features as permitted under the Historic District Guidelines, may extend over the specified maximum height limit by up to 50% of the height limit, but shall not contain any habitable spaces above the maximum zone height stated.

d. In order to accommodate a one-story element and pitched roof with a ridge design running perpendicular to the street, the Community Development Department may permit a building height increase, not to exceed 18 feet to the ridge line when measured from the midpoint of the front/street-side property line. Additional building height, pursuant to this exception, shall not be permitted for portions of the structure further back than 34 feet from the street-front property line. Prior to granting any additional building height, the Community Department shall find that the proposal complies with all requisite policies in the Historic District Design Guidelines and results in a better overall architectural design and neighborhood compatibility.

e. In order to accommodate a pitched roof running with a ridge design running perpendicular to the street, the Community Development Department may grant additional building height provided that no more than 20% of the ridge line exceeds the height requirements. Prior to granting any additional building height, pursuant to this exception, the Community Department shall find that the proposal complies with all requisite policies in the Historic District Design Guidelines, results in a better overall architectural design, and does not substantially interfere with sight lines of adjacent properties. *(This is intended to promote more historic roof forms and to prevent the proliferation of non-historic, long-sloping roof forms that run parallel to the slope.)*

SECTION 5. AMENDMENTS TO CHAPTER 13 OF THE LAND MANAGEMENT CODE. With regard to parking/garages, Chapter 13 is hereby amended as follows:

PARKING/GARAGES:

13.3. SPECIFIC REQUIREMENT FOR EACH LAND USE.

(a) ~~Required off-street~~ Off-street parking shall be provided for each land use as listed in this section. Multi-family structure uses are shown on the Multi-Family Parking Requirement Table. When applying the table, the parking requirements stated for each use, or combination of uses applies to each dwelling unit within the structure within the zone as shown. In some zones, the parking requirement may vary depending on the size of the project and its proximity to major destinations within the City, where experience has shown a greater or

lesser demand for parking. Other specific uses, and the parking requirement that applies are shown below:

Accessory apartments	One space per bedroom (see Chapter 8.19)
Lock-out unit (HR-1 and HRL Zones)	One space per bedroom
Single family dwelling:	Two spaces
Duplex:	Two spaces per unit (4)
Triplex:	Two spaces per unit (6)
Multi-Family structures larger than triplex structures	See table
Dormitory:	One space per 200 square feet of area devoted to accommodations

SECTION 6. EFFECTIVE DATE. This Ordinance shall become effective upon adoption and shall apply to all Historic District Design Review applications received on or after December 1, 1995.

PASSED AND ADOPTED this 7th day of December, 1995.

ORDINANCE NO. 95-52

AN ORDINANCE APPROVING THE FINAL PLAT FOR THE EAGLE POINTE SUBDIVISION, PHASE I LOCATED IN THE QUARRY MOUNTAIN MPD, PARK CITY, UTAH

WHEREAS, the owners of the property known as Eagle Pointe Subdivision (aka Quarry Mountain South Slope) have applied for a final plat for the first phase; and

WHEREAS, a properly noticed public hearing was held before the Planning Commission on August 30, 1995 and forwarded a positive recommendation to the City Council; and

WHEREAS, it is in the best interest of the City to approve the requested Final Plat; and

WHEREAS, the final plat is consistent with the Quarry Mountain MPD and Preliminary Plat approval;

NOW, THEREFORE BE IT ORDAINED by the City Council of the City of Park City, Utah as follows:

SECTION 1. PLAT APPROVAL. The final plat for Eagle Point Phase I is approved as shown on the attached Exhibit A with the following conditions:

1. The house size limitations shall be noted on the plat and shall be consistent with the Preliminary Plat approval as follows:

   3900 sq.ft. for lots under and including 14520 sq.ft.
   4500 sq.ft. for lots larger than 14520 to 21,780 sq.ft.
   6000 sq.ft. for lots larger than 21,780 to 1 acre
   7000 sq.ft. for lots larger than 1 acre

The note shall consist of a chart which lists each parcel number, total square footage and permitted maximum house size.

2. A note shall be added to the plat which shall require that limits of disturbance be required for each lot upon building permit application. Limits of disturbance (zone of no construction, excavation or vegetation removal) will be required on all site plans with areas of disturbance restricted to 15 feet on side yards, 20 feet on rear yards and 25 feet on front yards. The limits of disturbance can encroach into the setback area to the

property line, if the building zone is within 15 feet of the property lines. Some exceptions to this standard may be considered if it is necessary due to unique characteristics of the site and does not result in more disturbed area than would otherwise be allowed. The Park City Community Development Department will be required to review and approve all such exceptions.

3. The applicant shall be responsible for upgrading the pump station to accommodate additional irrigation demands on the site. The pump station will be upgraded to a standard approved by the Public Works Director and City Engineer. The maximum area on each lot which can be irrigated will be 10,000 sq. ft. and a note shall be placed on the plat which so indicates. Within that 10,000 sq.ft. of irrigated area, a maximum of 7,000 sq.ft. of sod will be allowed.

4. The plat shall be required to show trail easements consistent with the Planning Commission Preliminary Plat approval. A 4 foot wide, concrete sidewalk shall be provided along Meadows Drive and a 25 foot wide trail easement for a soft surface trail to the north of the parcels which will connect to Golden Eagle Court. The applicant will be responsible for constructing the trails. The entire soft surface trail will be required concurrent with phase I and the sidewalk associated with the improvements of Meadows Drive. The construction drawings shall reflect the trails.

5. Site specific analysis shall occur for lots 20, 21 and 22 prior to building permit issuance. This analysis shall involve the averaging of grade to allow a structure to be built consistent with adjacent structures. Grade for purposes of determining building heights which contain piles of rock shall be measured as if the piles were not there.

6. The City Engineer shall review and approve construction drawings prior to plat recordation. The applicant will be required to post a security for all public improvements prior to plat recordation. A 15 foot non-exclusive utility easement shall be dedicated to Park City along the entire frontage of both sides of Meadows Drive.

7. The City Engineer, City Attorney and Community Development Staff shall review and approve the final plat, CC&R's and Design Guidelines prior to plat recordation.

8. Access to the Mountain Top subdivision shall be maintained through this subdivision, including during construction.

9. All homes shall have external fire sprinklers and will be required to be fire sprinkled with a modified 13-D type interior sprinkler system. If the next phase of Eagle Point does not progress within 6 months of completion (or as soon after as weather permits) of the appurtenant section of Meadows Drive, the applicant shall be required to construct a turn around for emergency vehicles. The security for public improvements shall include this cost.

10. The name of Golden Eagle Court shall be changed because its similarity to Golden Eagle Drive. The new name is subject to the approval of the Fire Marshall.

11. The parcel of "future development" indicated between lot 24 and the Ridgeview Subdivision contains a future density range of 0 to 2 lots.

12. Lot A is to be dedicated to the City concurrent with plat recordation.

13. The reconstruction of the intersection of American Saddler and Meadows Drive shall be completed with the first phase improvements.

SECTION 2. EFFECTIVE DATE. This ordinance shall take effect immediately.

PASSED AND ADOPTED this 21st day of September, 1995.

Ordinance No. 95-48

AN ORDINANCE APPROVING THE FRANDSEN SUBDIVISION; BEING A REPLAT OF A PORTION OF LOT 8 AND LOTS 9, 10, 11 AND 12, BLOCK 21; AND A PORTION OF LOTS 7A AND 8, BLOCK 22 OF THE SNYDER'S ADDITION OF THE PARK CITY SURVEY; AND INCLUDING A PARCEL KNOWN AS SA-222, LOCATED AT 1445 WOODSIDE AVENUE; AND INCLUDING THE WOODSIDE AVENUE RIGHT-OF-WAY LOCATED ADJACENT TO THESE PARCELS FROM 1437 TO 1439 WOODSIDE AVENUE

WHEREAS, the owner of the property known as the Frandsen Subdivision has petitioned the Planning Commission and City Council for vacation of certain right-of-way and for approval of a final subdivision plat, including such a right-of-way; and

WHEREAS, proper legal notice was sent to all affected property owners; and

WHEREAS, on July 26, 1995 the Planning Commission held a public hearing and approved the final plat attached hereto as Exhibit A; and

WHEREAS, the City Council held a public hearing and considered the vacation and subdivision plat at a regularly scheduled meeting on August 31, 1995; and

WHEREAS, it is in the best interest of Park City, Utah to vacate the right-of-way and to approve the final plat, known as the Frandsen plat;

NOW, THEREFORE, BE IT ORDAINED by the City Council of Park City, Utah as follows:

SECTION 1. FINDINGS OF FACT.

1. The subdivision proposal is consistent with the Park City Land Management Code and State Statutes relating to vacation of public right-of-way.

2. The proposed lot configuration meets requirements of the RC Zoning District.

3. The proposed lot configuration will reduce the density from portions of seven or more lots with RC development potential, to three lots with limited single family or duplex development potential.

4. The proposed subdivision, with conditions, would preserve the "Old Town" residential character of this section of Woodside Avenue.

5. Historic buildings are valuable assets which contribute to the distinct character of the community. It is therefore desirable to encourage new construction of residential structures which are compatible with the mass and scale of the historic context. The applicant has agreed to dedicate a facade easement for the historic structure and limit the size and mass of any additions.

6. Large trees are valuable to the community for the beauty and shade they offer. The applicant has agreed to dedicate tree preservation easements for the large conifer and maple trees on the property. The owner has agreed to submit a landscape plan and show limits of disturbance prior to building permit issuance, to preserve other significant vegetation, including the boxelder trees on the west and south property lines.

7. The owner has agreed to dedicate a 10 foot snow storage easement across the front of these lots at the request of the City Engineer.

8. The owner has agreed to dedicate a 5 foot strip of land across the front of these lots as right-of-way for street widening or sidewalks if deemed necessary in the future.

9. The existing right-of-way adjacent to lots 9 - 12 does not continue to the north in front of 1445 Woodside Avenue, because the Snyder's Addition Subdivision Plat ends between 1439 and 1445 Woodside Avenue.

10. The paved Woodside Avenue is located entirely to the east of the platted Woodside in this location and the portion of platted Woodside that is to be vacated is not adjacent to existing right-of-way to the north, east, or west and is adjacent to only a remaining sliver of right-of-way to the south.

11. The applicant has agreed to limit construction on the 9363 sq. ft. Lot B to a single family or duplex house not to exceed 2,400 sq. ft. (current zoning would allow approximately 4,000 sq. ft.).

12. Parking will be provided in accordance with the City's Land Management Code.

13. The applicant has requested in writing the vacation of unimproved Woodside Avenue right-of-way, between Lots 9 - 12, Block 21 and Lots 7 and 8, Block 22 of the Snyder's Addition Subdivision plat.

14. Proper procedure for vacation of right-of-way was followed and proper notice given to all owners within the Snyder's Addition Subdivision.

15. A public hearing was held on July 26, 1995 by the Planning Commission and on August 31, 1995 by the City Council, to receive public input.

16. The applicant, Alan Frandsen, has agreed to the conditions of approval as listed in the following Section 3.

SECTION 2. CONCLUSIONS OF LAW. The City Council hereby concludes that there is good cause for vacation of the right-of-way and for the subdivision plat and that neither the public nor any person will be materially injured by the vacation or the proposed plat. The subdivision plat is in conformance with the Land Management Code.

SECTION 3. PLAT APPROVAL. The Frandsen Subdivision plat for 1437, 1439 and 1445 Woodside Avenue, being Lots A, B, and C is approved as shown on the attached Exhibit A with the following conditions:

1. Prior to plat recordation, the City Attorney and City Engineer shall review and approve the plat for conformance with the Land Management Code and this Ordinance.

2. Prior to plat recordation, the cinder block garage at 1439 Woodside Avenue shall be removed and the resulting disturbed area smoothly graded. All debris shall be removed.

3. All standard project conditions apply.

4. There shall be a note on the plat limiting the maximum house size for Lot B to 2,400 square feet, with an additional 600 square feet allowed for a garage.

5. There shall be a note on the plat, and a grant of easement submitted, granting a facade easement to Park City for historic preservation of 1439 Woodside Avenue.

6. There shall be a note on the plat granting a tree preservation easement to Park City, for the evergreen and maple trees at 1437 and 1439 Woodside Avenue. There shall be a note on the plat stating that prior to building permit issuance for 1437 Woodside Avenue, a landscape plan shall be submitted to the Planning Department. The landscape plan shall preserve as much of the significant and healthy vegetation as possible, especially the boxelder trees along the west and south property lines. Limits of disturbance shall be identified on both the landscape plan and site plan prior to building permit issuance.

7. There shall be a note on the plat dedicating to Park City a ten foot snow storage easement across the frontage of Lots A, B and C.

8. There shall be a note on the plat dedicating a five foot strip of public right-of-way adjacent to the front property lines for Lots A, B and C.

9. Prior to recording the subdivision plat, the applicant shall add a note to the plat specifying that no additional subdivision of the property shall occur.

10. There shall be a note on the plat stating that prior to demolition of the small shed on Lot B, the owner or applicant shall submit an application for and obtain a Certificate of Appropriateness for Demolition, according to Sections 4.14 - 4.17 of the Land Management Code.

SECTION 4. VACATION OF RIGHT-OF-WAY. Those portions of dedicated Woodside Avenue contained within the following parcel:

Beginning at a point which is East 1398.00 feet along the Section line from the Southwest corner of Section 9, Township 2 South, Range 4 East, Salt Lake Base and Meridian; and running thence North 55°30'00" East 122.00 feet; thence South 34°30'00" East 55.50 feet; thence South 35°59'00" East 82.90 feet to an intersection with the projected North property line of the Wildwood Condominium recorded; thence following the said North line the following five courses: (1) South 55°57'59" West 62.246 feet; (2) North 35°59'00" West 10.10 feet; (3) South 54°01'00" West 8.50 feet; (4) North 35°59'00" West 9.90 feet; (5) South 54°01'00" West 61.50 feet along the North line of Lot 8, Block 21, Snyders Addition to Park City, Park City, Utah to a point 5.00 feet East of the corners common to Lots 8, 9, 18 and 19 of said Block 21; thence North 35°59'00" West 127.91 feet to a point on said Section line; thence East 14.443 feet to the point of beginning.

SECTION 5. EFFECTIVE DATE. This Ordinance shall take effect upon adoption.

ORDINANCE 95-35

AN ORDINANCE DELETING SECTIONS 11-12-3, 11-12-13 AND 11-12-14 AND AMENDING CHAPTER 11-13 SCHOOL FACILITIES IMPACT FEES OF THE MUNICIPAL CODE OF PARK CITY, UTAH; ADOPTING THE 1995 CAPITAL FACILITIES PLAN AND IMPACT FEE ANALYSIS AND THE 1995 WATER CAPITAL FACILITIES PLAN AND IMPACT FEE ANALYSIS

WHEREAS, the provision of excellent public facilities, including public streets and storm water systems, public open space, trails and recreation amenities, public safety facilities and an award-winning water system, is a hallmark of the Park City community and a source of pride for all residents; and

WHEREAS, for the last several years, the City has been under constant pressure to provide new and expanded public facilities to address the impact of new development; and

WHEREAS, pursuant to common law, the City has levied impact fees on new growth and development in an attempt to encourage growth to pay its share of the cost of public facilities needed to serve growth; and

WHEREAS, in the past, the City had adopted impact fees for various public facilities, in separate sections of the Municipal Code, and had imposed those fees by fee resolution; and

WHEREAS, in special session, the 1995 state legislature adopted SB 4, an impact fee enabling statute, which limited the universe of public facilities for which impact fees could be imposed, which required certain administrative processes for independent fee calculations and appeals, and which required impact fees to be set by ordinance, rather than resolution; and

WHEREAS, in response to a threat to the health, safety, and welfare of the community at large the City has measured, planned for, and addressed the impacts of new development on the need for additional public facilities for over the next six to ten years and shall provide an independent fee calculation and appeal process pursuant to state law; and

NOW THEREFORE, be it ordained by the City Council of the Park City Municipal Corporation as follows:

SECTION 1: **FINDINGS.** The Council hereby finds and determines that:

1. New growth and development in the City creates additional demand for public facilities that cannot be mitigated without raising property taxes or imposing moderate impact fees; and

2. In the past, the City has encouraged growth and development to shoulder a proportionate share of the cost of public facilities needed to serve new growth and development; and

3. There remains significant pressure for additional public facilities to accommodate new growth and development; and

4. It is proper for developers or users of new residential development to pay a proportionate share of the cost of public facilities needed to serve such development; and

5. In anticipation of the impact of a sustained high rate of growth over the next six to ten years, the City has prepared a Capital Facilities Plan and Impact Fee Analysis and a Water Capital Facilities Plan and Impact Fee Analysis to estimate the proportionate cost of development on the demand for the construction of public facilities; and

6. In anticipation of SB 4, which takes effect in relevant part on July 1, 1997, Park City hereby adopts a procedural ordinance for all impact fees.

SECTION 2: **LONG-RANGE CAPITAL FACILITIES IMPROVEMENTS PROGRAM.** Park City has conducted extensive studies documenting the projected need for and cost of public facilities required by new growth and development over the next six to ten years. The results of that study are reflected in the 1995 Capital Facilities Plan and Impact Fee Analysis prepared by Rosenthal and Associates in June, 1995 and the 1995 Water Capital Facilities Plan and Impact Fee Analysis prepared by and for the Park City Public Works Department in June, 1995, attached hereto and incorporated and adopted into this Chapter by this reference.

SECTION 3: Municipal Code Section **11-12-3 IMPACT FEES** is hereby deleted.

SECTION 4: Municipal Code Section **11-12-13 WATER DEVELOPMENT FEES** is hereby deleted.

SECTION 5: Municipal Code Section **11-12-14 WATER CONNECTION FEES** is hereby deleted.

SECTION 6: Municipal Code Chapter **11-13 SCHOOL FACILITIES IMPACT FEES** is hereby amended as follows:

3. For School Facilities Impact Fees only, the construction of an accessory apartment, pursuant to Section 8-19 of the Land Management Code.

(B) The Director shall determine whether a particular Dwelling Unit falls within an exemption identified in this section or any other section. Determinations of the Director shall be reduced to a writing, which shall state the basis therefore, and shall be subject to the appeals procedures set forth in Section 11-13-6 below.

11-13-4 OFFSETS.

(A) A fee payer can request that an offset or offsets be awarded to him/her for the value of a required System Improvement identified in the Capital Facilities Plan and Impact Fee Analysis, the Water Capital Facilities Plan and Analysis, or the School Facilities Capital Improvement Program.

(C) The fee payer shall pay the cost of the appraisal.

(D) After receiving the appraisal, the Director shall provide the applicant with a letter or certificate setting forth the dollar amount of the offset, the reason for the offset, where applicable, the legal description of the site donated, and the legal description or other adequate description of the project or development to which the offset may be applied. (F) Determinations made by the Director pursuant to this section shall be subject to the appeals procedure set forth in Section 11-13-6 below.

(B) Appeals shall be taken within ten (10) days of the Director's issuance of a written determination, by filing with the Department a notice of appeal specifying the grounds for the appeal, and depositing the necessary fee, which is set forth in the existing fee resolution for appeals of land use decisions.

(C) The Department shall fix a time for the hearing of the appeal and give notice to the parties in interest. At the hearing, any party may appear in person or by agent or attorney.

(D) The Hearing Officer is authorized to make findings of fact regarding the applicability of the Impact Fees to a given Development Activity, the availability or amount of the offset, or the accuracy or applicability of an Independent Fee Calculation. The decision of the Hearing Officer shall be final, and may be appealed to the Third Judicial District Court for Summit County.

(E) The Hearing Officer may, so long as such action is in conformance with the provisions of this Chapter, reverse or affirm, in whole or in part, or may modify the determinations of the Director with respect to the amount of the Impact Fees imposed or the offset awarded upon a determination that it is proper to do so based on principles of fairness, and may make such order, requirements, decision or determination as ought to be made, and to that end shall have the powers which have been granted to the Director by this Chapter.

(F) Where the Hearing Officer determines that there is a flaw in the Impact Fee program or that a specific exemption or offset should be awarded on a consistent basis or that the principles of fairness require amendments to this

Chapter, the Hearing Officer shall advise the City Attorney as to any question or questions that the Hearing Officer believes should be reviewed and/or amended..

11-13-7 ESTABLISHMENT OF IMPACT FEES ACCOUNTS.

(A) Impact Fees shall be earmarked specifically and deposited in special interest-bearing Accounts. The fees received shall be prudently invested in a manner consistent with the investment policies of the City.

Money in these Accounts shall not be commingled with other funds.

(C) Impact Fees shall be disbursed, expended, or Encumbered within six (6) years of receipt, unless the Council identifies in written findings an extraordinary and compelling reason or reasons for the City to hold the fees beyond the six-year period. Under such circumstances, the Council shall establish the period of time within which Impact Fees shall be expended or Encumbered.

11-13-8 REFUNDS

(A) If the City fails to disburse, expend, or Encumber the Impact Fees within six (6) years of when the fees were paid, or where extraordinary or compelling reasons exist, such other time periods as established pursuant to Section 11-13-7(C) above, the current Owner of the property on which the Impact Fees have been paid may request a refund of such fees. In determining whether Impact Fees have been disbursed, expended, or Encumbered, such fees shall be considered disbursed, expended, or Encumbered on a first in, first out basis.

(B) Owners seeking a refund of Impact Fees must submit a written request for a refund of the fees to the Director within 180 days of the date that the right to claim the refund arises.

(C) Any Impact Fees for which no application for a refund has been made within this 180 day period shall be retained by the City and expended on the type of Public Facilities for which they were collected.

(D) Refunds of Impact Fees under this section shall include any interest earned on the Impact Fees.

(E) When the City seeks to terminate any or all components of an Impact Fee program, any funds not disbursed, expended, or Encumbered from any

terminated component or components, including interest earned shall be refunded pursuant to this section. Upon the finding that any or all fee requirements are to be terminated, the City shall place notice of such termination, and the availability of refunds, in a newspaper of general circulation at least two (2) times. All funds available for refund shall be retained for a period of 180 days. At the end of the 180 day period, any remaining funds shall be retained by the City, but must be expended on the type of Public Facilities for which they were collected.

(F) The City shall refund to the current Owner of property for which Impact Fees have been paid all Impact Fees paid, including interest earned on the Impact Fees attributable to the particular Development Activity, within one (1) year of the date that right to claim the refund arises, if the Development Activity for which the Impact Fees were imposed did not occur, no impact resulted, and the Owner makes written request for a refund within 180 days of the expiration or abandonment of the permit for Development Activity.

11-13-9 USE OF FUNDS

(A) Pursuant to this Chapter, Impact Fees:

1. Shall be used for Public Facilities that reasonably benefit the new development; and

2. Shall not be imposed to make up for deficiencies in Public Facilities serving existing developments; and

3. Shall not be used for maintenance or operation of Public Facilities.

(B) School Facilities Impact Fees may be spent for school facilities within the Park City School District, including but not limited to, construction of facilities, and/or the expansion of existing facilities, and auxiliary facilities, such as cafeterias and principals' offices, including the cost of land, design, structures, equipment and furniture, site improvements, and legal and administrative costs associated with collection and disbursement of the fees and the construction of such facilities.

(C) Impact Fees may be used to recoup costs of designing, constructing and/or acquiring Public Facilities anticipation of new growth and development to the extent that the Development Activity will be served by the previously-constructed improvements or the previously-incurred costs.

(D) In the event that bonds or similar debt instruments are or have been issued for the advanced provision of Public Facilities for which Impact Fees may be expended, Impact Fees may be used to pay debt service on such bonds, or similar debt instruments, to the extent that the facilities or improvements provided

are consistent with the requirements of this section and are used to serve the Development Activity.

11-13-10 INDEPENDENT FEE CALCULATIONS

(A) If a fee payer believes that a fee should be charged, other than the Impact Fees determined according to this Chapter, then the fee payer shall prepare and submit to the Director an Independent Fee Calculation for the Impact Fee(s) associated with the Development Activity for which a Building Permit is sought. The documentation submitted shall show the basis upon which the Independent Fee Calculation was made. The Director is not required to accept any documentation which the Director reasonably deems to be inaccurate, unsubstantiated, or unreliable and may require the fee payer to submit additional or different documentation prior to the Director's consideration of an Independent Fee Calculation.

(B) Any fee payer submitting an Independent Fee Calculation shall pay an administrative processing fee, per calculation, of $100..

(C) Based on the information within the Director's possession, the Director may recommend, and the City Manager is authorized to adjust, the Impact Fee to the specific characteristics of the Development Activity, and/or according to principles of fairness. Such adjustment shall be preceded by written findings justifying the fee.

(D) Determinations made by the Director pursuant to this section may be appealed subject to the procedures set forth herein.

SECTION 7: **SEVERABILITY.** It is hereby declared to be the intention of the City Council that the sections, paragraphs, sentences, clauses and phrases of this Ordinance are severable and, if any phrase, clause, sentence, paragraph or section of this Ordinance shall be declared unconstitutional by the valid judgment or decree of any court of competent jurisdiction, such unconstitutionality shall not affect any of the remaining phrases, clauses, sentences, paragraphs and sections of this Code, since the same would have been enacted by the City Council without incorporation in this Code of any such unconstitutional phrase, clause, sentence, paragraph, or section.

SECTION 8: **EFFECTIVE DATE**. This Ordinance shall take effect on June 30, 1995 and will apply to any project, the complete application for a building permit of which, has not been received by June 30, 1995.

uses the concept of an equivalent residential unit (ERU) which represents the average water use by existing single-family residential units. Other uses are converted to ERU's based on expected water use. The water facilities proposed in the WCFP will serve approximately 3450 ERU's

Water Connection Fees. The WCFP shows that $2,824,729 worth of improvements are necessary to meet our growth demands. Dividing that figure by 3,450 ERU's yields $818 per ERU.

The size of houses and landscaped areas vary significantly and those differences affect the amount of water required to serve the new development. Applying the premise used for Park City water impact fees since 1990, the fee system should fairly account for the differential impacts on water facilities of indoor and outdoor water use. The EWP report identifies that 37.5% of total water use should be allocated indoors; outside use (primarily irrigation) represents 62.5% of total water use. These proportions are based on peak period usage because Park City's water facilities are and must be designed to meet peak demand. The proportions take into account the City's conservation requirements including alternate day irrigation. This equates to an average indoor fee of $307 and an average outdoor fee of $511.

To more fairly assess the impact of new development on water facilities, Park City's actual fees should have indoor and outdoor components and be based on the size of the house and the amount of irrigated landscaped area.

The maximum indoor charge for Water Connection is based on the following table:

Size (sf)	up to 1000	1001-1500	1501-3000	3001-4500	4501-6000	6000+
# of BR's	2	3	4	5	6	7+
ERU	.50	.75	1.00	1.25	1.50	1.75
Charge ($)	153	230	307	383	460	537

To calculate the indoor component of the Water Connection Fee, the house size is determined by the more restrictive of liveable area in square feet (size) or number of bedrooms. This size is converted to a proportional ERU, multiplied by the average indoor fee and rounded down to the nearest $10 dollars. For example, a 3000 square foot, four bedroom home would be one ERU and would have a maximum indoor charge of $307. A 4500 square foot, four bedroom home would be 1.25 ERU's and would have a maximum indoor charge of $383. A 950 square foot, three bedroom home would be .75 ERU's and would have a maximum indoor charge of $230.

Based on the average outdoor fee of $511 and the average irrigated area of 7000 square feet the outdoor charge is $0.073 per square foot of irrigated landscaped area. In recognition that not all outdoor use is for irrigation, to allow some flexibility for the homeowner installing landscaping and to reduce administrative costs of the fee system, the fees are grouped into seven categories. The maximum outdoor charge for Water Connection is based on the following table:

Irrigated Area (sf)	0-2000	2001-4000	4001-6000	6001-8000	8001-10000	10000+
Charge ($)	73	219	365	511	657	657+ (1)

(1) the last category would be the charge of the previous category plus $73.00 for each 1000 square feet of irrigated area over 10,000 square feet..

The irrigation portion of the Connection Fee is significantly higher than in previous fees. The new rate better reflects the proportional impact outdoor use in new development has on the need to expand the water system.

The largest portion of the outdoor water demand in most new homes is for irrigation of sod or turf. Lawns require much more water than many other types of landscaping. However, builders and home owners often use sod because of the lower initial cost, simpler sprinkler system design, and to achieve a quick, finished look to obtain early release of their landscape letter of credit. Staff originally considered a special charge on sod or turf in recognition of its higher water demand. Testimony at the public hearing held on May 11, 1995 opposed that approach. The system currently proposed does not include a special charge for lawns. The City has other programs to encourage low water consuming landscape solutions and may propose others in the future.

The maximum Water Connection Fee for new development would be the sum of the charge for indoor use and the charge for outdoor use.

Development Fees. The development fee pays for the water rights necessary to serve the new construction and the costs to develop those right into physical sources. Hence, the water development fee has two parts: water rights and source development.

Based on the EWP report, identified the water use of the average home (ERU) at 259,000 gallons or 0.795 acre foot per year. The cost to acquire a high priority water right for one acre foot and to convert it to municipal use (exclusive of any physical development) is $2495 based on an average of recent large purchases and conversions of water rights. This cost is conservative because it assumes full conversion and use of the water right. This is not always achievable and State Engineer approval of new water rights can take from two to five years with the longer intervals significantly increasing the conversion costs. This acquisition and conversion cost translates into $1,984 (rounded to $1980) per typical home (ERU).

The WCFP shows that $9,071,699 worth of improvements for source development are necessary to meet the demands of new development. Dividing that figure by 3,450 ERU's yields $2629 per ERU. Summing the two parts yields a total of $4613. The same distribution to indoor and outdoor use may be applied to development fees as used for connection fees.

The maximum indoor charge for Water Development is based on the following table:

Size (sf)	up to 1000	1001-1500	1501-3000	3001-4500	4501-6000	6000+
# of BR's	2	3	4	5	6	7+
ERU	.50	.75	1.00	1.25	1.50	1.75
Charge ($)	864	1296	1729	2161	2593	3025

The average outdoor fee is $2883. Adjusting for the size of the irrigated landscaped area the maximum outdoor charge for Water Development is based on the following table:

Irrigated Area (sf)	0-2000	2000-4000	4000-6000	6000-8000	8000-10000	10000+
Charge ($)	411	1235	2059	2883	3706	3706+ (1)

(1) the last category would be the charge of the previous category plus $411.00 for each 1000 square feet of irrigated area over 10,000 square feet.

The maximum Water Development Fee for new development would be the sum of the charge for indoor use and the charge for outdoor use.

Commercial Water Impact Fees. The WCFP shows the improvements necessary to meet growth demands for all types of development. To use the fee approach described above for commercial uses, these uses must be converted to ERU's for indoor use (outdoor uses would be calculated the same as for residential uses).

The State of Utah publishes the "State of Utah Public Drinking Water Regulations". Table 5.1 identifies estimated indoor water requirements for commercial applications; Section 5.1.2.2 "Hotels, Motels and Resorts, Indoor Use" identifies the use for those activities. These documents are incorporated herein by reference.

This information may be used to calculate the indoor water requirements of a commercial application and to convert the commercial use to an ERU. The average indoor water use of an ERU is 97,000 gallons per year . By dividing the total commercial indoor use by 97,000 gallons, a factor can be determined. For the ease of calculation, the indoor portion of the ERU has been rounded to 100,000 gallons (thereby lowering the maximum fee slightly). The commercial indoor use is converted to ERU's by computing the annual use, dividing by 100,000 and rounding down to the nearest 0.05 of an ERU as follows:

USE	**ERU**
Industrial or warehousing	0.05 per 1000 sf or employee
Laundry	1.05 per machine

Theater or auditorium	0.08 per 10 seats
Office	0.20 per 1000 sf or 0.03 per employee
Restaurant	0.05 per seat
School	0.03 per student (capacity)
Retail Shops	0.35 per thousand sf
Service Commercial or large retail	0.20 per thousand sf
Hotel or motel	0.03 per room
Taverns or bars	0.03 per seat

Uses not in the table will be computed by the Public Works Director as follows: the annual indoor use in gallons will be estimated; that number will be divided by 100,000 gallons; and the quotient will be rounded down to the nearest 0.05 of an ERU.

CONCLUSIONS AND RECOMMENDATIONS

Park City has revised and refined its water impact fees several times since originally implementing them in the early 1980's. The proposed changes to Park City's water impact fee system are expected to make it more reflective of the true impact of new development on water facilities, consistent with the plan for capital facilities required by new development and compatible with new legislation. The proposed impact fees would generally lower the charges for indoor usage. Residential construction with limited landscaping would likely see a net reduction in water impact fees. Landscaped areas will represent a larger portion of the total charge. Development with large irrigated areas would likely see a net increase in water impact fees.

The method of water impact assessment employs a combination of measures of indoor and outdoor uses. The equivalent residential unit (ERU) adjusts indoor water use by size and type of new development; irrigated area addresses potential outdoor water uses for residential and commercial land uses. This approach was selected from among competing alternatives - for example, impact calculated based on number of bedrooms, household size or unit equivalent alone - as most definitive in capturing the true cost of water facility demand generated by new development, based on past experience, and in light of the unique circumstances of a resort community where facility need is defined by peak demand, quantified as *peak impact potential.* Local experience during the period the water impact fee program has been in effect has shown that *impact potential* is the only equitable way to establish the true effect of new development, and to correlate that to actual water facility demand, while minimizing other potential inequities. The potential for peak demand is significantly above the average demand, and based on experience in Park City, represents actual capacity expansion requirements. The cost of *peak impact potential* is reflected in the impact assessment - a large home with more finished area is charged more than a smaller home; a use with a large landscaped area is charged more than one with little or no landscaping.

The WCFP should be updated every two years to assure accuracy and fairness. The fees should be revised accordingly.

Several features of the proposed system are designed to facilitate public understanding and ease of administration. For example, fee tables, rather than complex formulas, are used whenever possible. Additionally, the fee system is structured to promote fair assessment without risk of overcharging. Calculated maximum fees are conservatively computed by rounding down. Fees are recommended at less than the full (maximum) impact assessment. The fees are recommended to be capped below the maximum as a matter of policy, primarily to promote cross generational-equity and to avoid the administrative complications of rebate and appeals.

Recommended Fees

Water Connection Fee

The recommended indoor charge for Water Connection is:

Size (sf)	up to 1000	1001-1500	1501-3000	3001-4500	4501-6000	6000+
# of BR's	2	3	4	5	6	7+
ERU	.50	.75	1.00	1.25	1.50	1.75
Charge ($)	150	225	300	375	450	525

The recommended outdoor charge for Water Connection is:

Irrigated Area (sf)	0-2000	2000-4000	4000-6000	6000-8000	8000-10000	10000+
Charge ($)	70	210	350	490	630	630+ (1)

(1) the last category would be the charge of the previous category plus $70.00 for each 1000 square feet of irrigated area over 10,000 square feet.

Water Development Fee

The recommended indoor charge for Water Development is:

Size (sf)	up to 1000	1001-1500	1501-3000	3001-4500	4501-6000	6000+
# of BR's	2	3	4	5	6	7+
ERU	.50	.75	1.00	1.25	1.50	1.75
Charge($)	850	1275	1700	2125	2550	3000

Irrigated Area (sf)	0-2000	2000-4000	4000-6000	6000-8000	8000-10000	10000+
Charge ($)	400	1200	2000	2800	3600	3600+ (1)

(1) the last category would be the charge of the previous category plus $400.00 for each 1000 square feet of irrigated area over 10,000 square feet.

COMMERCIAL FEES

The commercial water impact fees are based on conversion of uses to ERU's according to the following table:

USE	**ERU**
Industrial or warehousing	0.05 per 1000 sf or employee
Laundry	1.05 per machine
Theater or auditorium	0.08 per 10 seats
Office	0.20 per 1000 sf or 0.03 per employee
Restaurant	0.05 per seat
School	0.03 per student (capacity)
Retail Shops	0.35 per thousand sf
Service Commercial or large retail	0.20 per thousand sf
Hotel or motel	0.03 per room
Taverns or bars	0.03 per seat

Uses not in the table will be computed by the Public Works Director as follows: the annual indoor use in gallons will be estimated; that number will be divided by 100,000 gallons; and the quotient will be rounded down to the nearest 0.05 of an ERU.

Indoor charges would be $300.00 per ERU for for Water Connection and $1700.00 per ERU for water Development.

Outdoor charges would be the same as for residential uses.

CAPITAL FACILITIES PLAN AND IMPACT FEE ANALYSIS

OVERVIEW

This report describes the objectives and methodology that underlie the Park City impact fee system.

The history and use of impact fees in Park City is described by city budget and finance policy, as follows:

> Development impact fees are collected and used to offset certain direct impacts of new construction in Park City. Park City has imposed impact fees since the early 1980's. Following Governor Leavitt's veto of Senate Bill 95, the 1995 State Legislature approved revised legislation (SB 94) to define the use of fees to mitigate the impact of new development. Park City's fees were adjusted to conform with restrictions on their use. The fees will be comprehensively revised by 1997 to fully conform with the new legislation. Fees are collected to pay for capital facilities owned and operated by the city (including land and water rights) to address impacts of new development on the following service areas: water, drainage, public safety, parks (including open space, recreation facilities, and trails) and streets. The fees are not used for general operation or maintenance. The fees are established following a systematic assessment of the capital facilities required to serve new development. The city will account for these fees to assure that they are spent within six years, and only on eligible facilities. In general, the fees first collected will be the first spent.[1]

This report updates previous impact fee analyses, and is intended to:

- Substantiate the *need* for planned capital spending.
- Identify a *level of service standard* for each facility type - show that it is consistently applied and that demand presented by new development threatens to degrade the standard.
- Identify the *component* of planned capital expense undertaken to meet demand generated by new development.
- Define a fee *calculation methodology* that equitably apportions facility development cost among those benefited by he facilities.
- Define a methodology that recognizes differential impact, attendant to different property types and sizes.
- Update planned capital spending and impact fee rate.

Administrative objectives include the following:

- Methodology which is intuitive, rational, and *easy to explain.*
- *Simplified fee calculation guidelines* that obviate a need for detailed analysis with each application.
- *Cost-effective* methodology that utilizes existing administrative structure, personnel and equipment to assess the fee, collect the funds and disburse the proceeds.

CAPITAL FACILITIES PLAN AND IMPACT FEE ANALYSIS

SUMMARY

The Park City impact assessment is defined as an amount sufficient to offset a proportionate share of the cost of capital facilities needed to serve demand generated by new development. The fee is computed as a percent of construction value - a method which defines facility impact based on project size and use type. The City Council in the past has chosen to implement a capped fee, charged at a rate less than that required to fully offset the cost of facilities built to serve new development. The fee has been implemented at the same capped rate - 2% of construction value - as a means of promoting cross generational equity, administrative ease, and intuitive methodology.

Capital spending for new development is defined by the Capital Facilities Plan (CFP) - a derivative of the standard Park City Capital Improvement Program. The CFP is specified as part of a formalized analytical process - the annual Capital Facilities Programming Process - which verifies need and prioritizes competing projects.

Impact fee proceeds are accounted for separately. Collection and use of the funds is accomplished so that benefit accrues to each subject property. Funds are generally expended in the order collected - first in first out. Funds are generally expended within six years of collection.

The CFP and fee rate are evaluated and updated biennially to ensure on-going proportionate, and equitable assessment. The fee may be set at or below the maximum fee. For 1996, the maximum fee is 2.804% of construction value.

CAPITAL PROGRAMMING PROCESS

The City has a formalized process to identify capital facility demand and to define a plan - the *Capital Improvement Plan* (CIP) - to meet that need. The process is implemented as part of General Budget Policy,[2] and is informed by the following objectives:

- Identify residents' needs for facilities
- Prioritize facilities
- Evaluate the means for delivering facilities and organize programs to provide the facilities
- Identify available resources and appropriate funds to undertake the projects
- Establish appropriate service levels
- Set standards to measure delivery of services
- Evaluate accomplishment of objectives and use of appropriations

These objectives define a planning environment which calls for realistic prioritization, consistent definition of performance standards, cost-effective implementation, and regular assessment of goal achievement. They serve to distill expectations and to prioritize competing projects - the effect of which is to implement a capital budgeting process which guarantees that needed projects defined by consistent service provision standards, are undertaken.

CAPITAL FACILITIES PLAN AND IMPACT FEE ANALYSIS

CAPITAL PROGRAMMING PROCESS (CONT.)

The capital budgeting process, by means of the *Capital Improvement Management Plan,* serves to evaluate competing needs for facility replacement, facility enhancement, and capacity expansion to meet demand generated by new development. The process is lead by the City Council which defines annual capital improvement objectives, and includes a series of public meetings, staff review, review by the CIP committee, department heads, the City Manager, and finally, approval by the Council of recommended appropriations.

The process yields a list of *scheduled projects* for which funding is available and which will be undertaken in the near term; and prioritized but *unscheduled projects* which are necessary, but given limited resources are not immediately planned for funding. In 1996, the draft CIP[3] includes recommended spending of about $36.1 mil, and has scheduled funding of only about $14.3 mil.

Competition for funds and the need to balance capital spending for existing residents against demands presented by new development - facility maintenance or upgrade versus capacity expansion - guarantees that underlying service provision standards are applied uniformly, and that each project undergoes sufficient professional evaluation to ensure that it is properly specified and essential. All potential funding sources are considered for each project before the CIP is finalized.

A formal capital budgeting process has been implemented and refined in Park City for more than ten years. The effect of that process is to enforce consistent standards for capital project selection and service provision, and because of that, new development from year to year is called upon only to support a level of spending needed to implement narrowly defined capital facility capacity expansion requirements.

CAPITAL BUDGET ALLOCATION

The capital budget allocation process is based on the CIP and defines a sub-set of total planned capital expense - the *Capital Facilities Plan* (CFP) - which identifies projects undertaken to meet demand generated by new development.

The CFP analytical process begins with a review of each scheduled capital project to identify and delete costs attributable to maintenance or the correction of a capacity, or qualitative facility deficiency.

Projects are then assigned to one of four *Project Classification Categories* based on an analysis of the type of facility and its intended function - only projects with a growth component of more than 25% are included in the CFP (and hence, eligible for funding with impact fees). Project classification categories quantify the "new development" component of planned capital spending and define a consistent analytical process from year to year, so that the CFP enforces the same performance standard for each generation of new development.

CAPITAL FACILITIES PLAN AND IMPACT FEE ANALYSIS

CAPITAL BUDGET ALLOCATION (CONT.)

Project Classification Categories are summarized as follows:

Table 1

Project Classification Categories

Class	Allocation	Project Type
I	100%	Projects initiated solely to provide added capacity to meet demand generated by new development
II	75%	Projects where more than 75% of spending is for work to meet demand generated by new development, but which include a minor, deficiency correction component, for improved service to existing residents
III	50%	Projects where more than 75% but less than 50% of spending is attributable to capacity expansion to meet demand generated by new development.
IV	25%	Projects initiated primarily for deficiency correction, but which have a component exceeding 25% of project cost, directed towards capacity expansion for new development.

IMPACT FEE CALCULATION

The *Capital Programming Process* assesses "need"; the *Capital Budget Allocation Process* defines facilities and spending planned to meet demand generated by new development, and in turn the *Impact Fee Calculation methodology* proportionately assigns that cost among beneficiaries.

Projects identified in the CFP are assigned to categories of impact according to approved Park City impact fees, summarized as follows:[4]

Table 2

Impact Fee Description

	Fee Rate (% of CV)		Description
	Fee	% of Total	
Parks and Open Space	1.899%	67.738%	Park land and improvements, recreation facilities, open space and trails
Roads and Drainage	0.829%	29.565%	Storm water, drainage and flood control projects - master planned roads and appurtenances, and associated improvements to federal or state roads.
Public Safety Facilities	0.076%	2.696%	Buildings for fire protection, police or other public safety entities
Total	2.804%		

The fee rate for each capital facility type is calculated to offset the cost of the CFP for that type, and to proportionately allocate that cost according to relative impact, among new entrants.

[4] The impact fee for *Roads* and *Drainage* is combined because road and drainage projects are most often undertaken together and costs for each are inextricably intertwined.

CAPITAL FACILITIES PLAN AND IMPACT FEE ANALYSIS

IMPACT FEE CALCULATION (CONT.)

The fee rate is computed as a percent of annual *building activity,*[5] and then assessed against a given quantity of construction, for each new development or building permit application.[6] The assessment is expressed in dollar terms as a percent of uniform *construction value.*[7]

The fee rate is calculated as:

$$\left[CFP\ Total \div \left(Annual\ Building\ Activity \times 5\right)\right] = Fee\ Rate\ .^{8}$$

The fee rate for 1996 is computed as follows, and will offset the full cost of the CFP, given annual new construction of $52.9 mil.

$$\left[\$7{,}417{,}061 \div \left(\$52{,}900{,}000 \times 5\right)\right] = 2..804\%$$

The impact assessment is calculated as:

$$\left[Fee\ Rate \times Construction\ Value \times Enclosed\ Area\right] = Impact\ Fee\ Assessment$$

Construction value is used as a surrogate to define relative capital facility demand, and varies for each type of new development.

Construction value for sample property types is as follows:

Table 3

Construction Value
(1995 building valuation)

	Construction Type	Construction Value ($ per sq. ft.)
Single Family	Frame	$78.00
Apartment House	I	$89.00
Retail	I	$67.40
Office	III	$62.40
Hotel/Motel	III	$71.00
Resturant	III	$78.80
Industrial	III	$35.30
Warehouse	III	$25.90

[5] Annual *Building Activity* is tracked by the city, and is projected at the beginning of each year as the average of construction value for last three years. See Park City Municipal Corporation Annual Budget for current projection.
[6] The fee is paid at the time of building permit receipt.
[7] Construction value is based on ICBO construction cost information, published each year by the city as *Building Valuation Data.* Construction value = [Building Valuation (cost per sq. ft.) x area]
[8] The CFP projects 5 year new development capital spending needs and *CFP Total* represents a 5 year spending projection.

CAPITAL FACILITIES PLAN AND IMPACT FEE ANALYSIS

IMPACT FEE CALCULATION (CONT.)

This method of assessment accounts for differential impact, according to property type and size, to ensure proportionate allocation of costs. Different property types have different impact characteristics. Projects of different size[9] present different potential for impact - each are assessed a fee amount that corresponds to proportionate facility service demand.

The impact assessment is based on a compound unit of measure that relies on unit size and type to quantify relative impact. This approach was selected among competing alternatives - for example, impact calculated based on number of bedrooms, household size or unit equivalent - as most definitive in capturing the true cost of attributable capital facility demand, based on past experience, and in light of the unique circumstances of a resort community where capital facility need is defined by peak demand.[10]

Peak demand is given by *peak impact potential*. Local experience has shown during the 20 years that the impact fee program has been in effect that impact potential (peak use) is an equitable way to identify the *true* effect of new development, and to correlate that to facility service demand while minimizing other potential inequities.

Impact potential is illustrated by reference to an example. Construction of large home presents the potential for significant peak facility demand - road capacity must be sufficient to accommodate periodic large gatherings and temporarily increased household size during visits by guests or extended family. Typical household size and behavior, in this instance may suggest average capital facility impact.[11] But *potential* facility demand is significantly above the average, and according to local government experience represents *actual* capacity expansion requirements. The cost of peak potential is accounted for in the method of impact assessment - a large home with more finished area is charged more than a smaller home, or one of similar size but with larger basement and garage, and reduced finished area. Both however are assessed at the same *unit cost*. This means that the value of amenities - perhaps significant in a larger home, but without consequence in assigning capital facility impact - is not factored in the impact assessment and has no effect in increasing the fee relative to all other single family new development.

In the same way that potential peak demand varies by unit size, it also varies by property use. A compound unit of measure assigns a different impact unit cost to each property use and in that way accounts for different relative intensity of demand - lower intensity property use is valued at a lower rate, and higher intensity use at a higher rate.

Parks, Roads and Drainage, and Public Safety impact fees all support facilities which are sized according to peak potential service demand. Parks, open space and trails facilities for example are presented with the same potential facility demand from new development, as that described for roads.

---

[9] Enclosed area.

[10] Average demand is a reasonable measure of capital facility impact in a community where the difference between average and peak demand is small. In a resort community the difference is large, and average facility demand is an inadequate measure that tends to understate actual need.

[11] Or below average impact if for example, the home is used less than year round.

CAPITAL FACILITIES PLAN AND IMPACT FEE ANALYSIS

IMPACT FEE CALCULATION (CONT.)

Calculation of the impact assessment relies on an allocation of benefit which averages CFP expense for the current period among all new development completed during that period, within the single, city-wide facility benefit district. This continues a practice of impact assessment dating from 1984, where new entrants are called upon to support construction of additional capacity to serve new development, in recognition of previous contributions provided the current generation under the same approach.

This method of assessment is consistent with the way in which capital projects are undertaken. Road and drainage projects are an example. Often these are planned to provide capacity beyond that needed to meet current demand. This capacity is provided to future residents at a cost born by the current generation, but offset by current excess capacity which acts to reduce planned capital spending during the current period.

Equity among generations is ensured by the capital budgeting process - the application of consistent service provision standards, effective verification of need, competition for funds and well defined prioritization of projects, and a rigorous CFP allocation process.

Historically, the fee has been implemented, under direction of the City Council, at a capped rate.[12] This serves the interest of cross generational equity - all new development continues to be assessed at the same impact fee rate. It also implements impact fee system administrative objectives - simplified program administration, intuitive calculation methodology, and use of existing resources. The council may authorize a fee at any level up to the maximum rate of 2.804%. To the extent that the fee is established below the maximum rate, other revenue sources must be added to fund CFP projects. The General Fund, grants, and the Redevelopment Authority are typical sources for these additional revenues.

ACCOUNTING EXPENDITURE AND REFUND

Three impact fees are assessed in support of three separate types of CFP projects. Fee receipts are accounted for separately and are used to fund projects in the appropriate category.

Collection and use of the funds is accomplished so that benefit accrues to each subject property. Funds are generally expended in the order collected - first in first out. Funds are expended within six years of collection.

[12]The 1995 capped rate is 2% of construction value. The full impact assessment for 1996 is 2.804%.

Ordinance 95-15

AN ORDINANCE ESTABLISHING A PROCEDURE OF REVIEW AND GUIDELINES FOR ACTIONS THAT MAY INVOLVE A CONSTITUTIONAL TAKING; AND ESTABLISHING AN APPEAL PROCEDURE FOR CONSTITUTIONAL TAKINGS, PURSUANT TO MANDATES OF THE PRIVATE PROPERTY PROTECTION ACT

WHEREAS, the City intends to promote the protection of private property rights and to prevent the physical taking or exaction of private property without just compensation; and

WHEREAS, the City wishes to establish a procedure and guidelines pursuant to UCA § 63-90-1 et al, as amended, to help identify actions that might result in the physical taking or exaction of private property; and

WHEREAS, a public hearing on the proposed procedural amendment to the Land Management Code was held on March 16th, 1995; and

WHEREAS, the City Council has determined that this ordinance is the best interest of the residents of Park City;

NOW THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF PARK CITY, UTAH THAT:

SECTION I. AMENDMENT. A new Section 1.23 of the Land Management Code of Park City is hereby created to read as follows:

1.23 **CONSTITUTIONAL TAKINGS REVIEW AND APPEAL**. In order to promote the protection of private property rights and to prevent the physical taking or exaction of private property without just compensation, the City Council and all Commissions and Boards shall adhere to the following before authorizing the seizure or exaction of property:

(a) Takings Review Procedure. Prior to any proposed action to exact or seize property by the City Council or any Commission or Board, the City Attorney shall review the proposed action to determine if a constitutional taking requiring "just compensation" would occur. The City Attorney shall review all such matters pursuant to the guidelines established in subsection (b) herein. Upon identifying a possible constitutional taking, the City Attorney shall, in a confidential, protected writing, inform the City Council, Commission or Board of the possible consequences of its action. This opinion shall be advisory only and no liability shall be attributed to the City for failure to follow the recommendation of the City Attorney.

(b) Takings Guidelines. The City Attorney shall review whether the action constitutes a constitutional taking under the Fifth or Fourteenth Amendments to the Constitution of the United States, or under Article I, Section 22 of the Utah Constitution. The City Attorney shall determine whether the proposed action bears an essential nexus to a legitimate governmental interest and whether the action is roughly proportionate and reasonably related to the legitimate governmental interest. The City Attorney shall also determine whether the action deprives the private property owner of all reasonable use of the property. These guidelines are advisory only and shall not expand nor limit the scope of the City's liability for a constitutional taking.

(c) Appeal. Any owner of private property who believes that his/her property is proposed to be "taken" by an otherwise final action of the City may appeal the City's decision to the Takings Appeal Board within thirty (30) days after the decision is made. The appeal must be filed in writing with the City Recorder. The Takings Appeal Board shall hear and approve and remand or reject the appeal within fourteen (14) days after the appeal is filed. The Takings Appeal Board, with advice from the City Attorney, shall review the appeal pursuant to the guidelines in subsection (b) herein. The decision of the Takings Appeal Board shall be in writing and a copy shall be given to the appellant and to City Council, Commission or Board that took the initial action. The Takings Appeal Board's rejection of an appeal shall constitute final City action.

(d) Takings Appeal Board. There is hereby created a three member Takings Appeal Board. The City Manager shall appoint three current members of the Board of Adjustment to serve on the Takings Appeal Board. If, at any time, three members of the Board of Adjustment cannot meet to satisfy the time requirements stated in subsection (c), the City Manager shall appoint a member or sufficient members to fill the remaining vacancies.

SECTION II. ANNUAL REVIEW. The City Attorney shall review these guidelines annually and recommend changes as warranted by the current status of the law. Nothing herein shall prevent the City Attorney from considering subsequent legal standards established by the legislature or case law after the adoption of this section.

SECTION III. AMENDMENT. Chapter 2 of the Land Management Code of Park City is hereby amended by adding a new definition to read as follows:

Constitutional Taking. ORDINANCE 95-5

AN ORDINANCE AMENDING THE MUNICIPAL CODE OF PARK CITY BY ADDING A NEW SECTION 4-9-1 THROUGH 4-9-22 REGULATING SEXUALLY ORIENTED BUSINESSES AND AMENDING SECTION 8-4-20, THE CRIMINAL CODE

WHEREAS, Section 10-8-41, Utah Code Annotated gives the City the power to suppress and prohibit the keeping of disorderly houses, houses of ill fame or houses kept by, maintained for, or resorted to or used by, one or more persons for acts of perversion, lewdness or prostitution and also empowers the City to make it unlawful for lewdness or moral perversion or for any person to secure, induce, procure, offer or transport to any place within the City any person for the purposes of committing an act of sexual intercourse for hire, lewdness or moral perversion or for any person to receive or direct or offer or agree to receive or direct any person into any place or building within the City for the purposes of committing an act of sexual intercourse for hire, lewdness or moral perversion or for any person to aid, abet or participate in the commission of any of the foregoing and further prohibit the sale, distribution or exhibition of obscene or lewd publications, prints, pictures or illustrations; and

WHEREAS, Section 10-8-84 allows the City to pass all ordinances and rules, and make all regulations, not repugnant to law, necessary for carrying into effect or discharging all powers and duties conferred by Chapter 8 of Title 10 of Utah Code Annotated which are necessary and proper to provide for the safety and preserve the health, and promote the prosperity, improve the morals, peace and good order, comfort and convenience of the City and its inhabitants; and

WHEREAS, the City Council has relied on the findings and experiences of cities including Salt Lake City, Sandy City, West Valley City and others concerning the effects and regulation of sexually oriented businesses; and

WHEREAS, as a result of these findings and experiences, the City Council finds that sexually oriented businesses are frequently used for unlawful sexual activity; and

WHEREAS, licensing and zoning are legitimate and reasonable means of time, place and manner regulations to ensure that operators of sexually oriented businesses comply with reasonable regulations and to ensure that operators do not knowingly allow their establishments to be used as places of illegal sexual activity or solicitation; and

WHEREAS, there is convincing documented evidence that sexually oriented businesses, because of their very nature, have a deleterious effect on both the existing businesses around them and residential areas adjacent to them, causing increased crime and the degrading of property values; and

WHEREAS, the City Council finds that it is recognized that sexually oriented businesses, due to their nature, have serious objectionable operational characteristics particularly when they are located in close proximity to each other, thereby contributing to urban blight and

downgrading the quality of life in the adjacent areas; and

WHEREAS, the City Council desires to minimize and control these adverse effects and thereby preserve the property and character of surrounding neighborhoods, deter the spread of urban blight, protect the citizens from increased crime, preserve the quality of life, and protect the health, safety and welfare of the citizenry; and

WHEREAS, the City Council desires to protect the patrons of sexually oriented businesses from dangerous conditions and to protect the youth of the City from exposure to inappropriate material; and

WHEREAS, many City residents are offended by sexually oriented businesses and harbor fears about their own safety and the well-being of their children and families if exposed to such businesses and the persons who patronize them and these residents should have their rights of travel and association accommodated, if reasonable; and

WHEREAS, the time, place and manner restrictions of this ordinance are required to protect important governmental interests and are reasonably related to achieve the protection of those interests with the minimum interference necessary to rights protected by state and federal constitutional provisions,

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF PARK CITY, as follows:
