

1. In Qualifications, 1.b) it mentions “including at least one (1) in the State of Utah.” Would you be able to consider vendors that do not have Utah-specific experience?

Proposals will not be excluded from the Selection Process. Utah-specific experience is preferred due to unique Utah State Code requirements. Please refer to iii. Funding.

2. In Exhibit A, why is (F) Technology Errors and Omissions separate from (C) Professional Errors and Omissions?

Please note that Technology Errors & Omissions coverage is Professional E & O for the Technology Industry and provides the same coverage as Professional E & O; however; Professional E&O also provides coverage for errors, omissions, misrepresentation, and negligence of other professional services provided outside of Technology. Although not common, we could have a vendor that would need both.

3. In the Evaluation Criteria, what is the point allocation formula for “Cost Reasonableness”?

The point allocation formula is 20% of the total evaluation and will allow us to compare proposed service costs across vendors.
