

JOIN PARK CITY MUNICIPAL IN REACHING ITS GOAL OF NET-ZERO CARBON AND ZERO WASTE!

Welcome to Park City, home of the Sundance Film Festival!

Let's face it: your arrival and departure in Park City this winter will bring with a huge amount of "stuff." While much of this "stuff" is the product you're marketing, promoting and possibly even selling – and even greater amount of "stuff" you'll bring is the packaging material, e.g. cardboard boxes, plastics, and Styrofoam and the common waste that your product travels with.

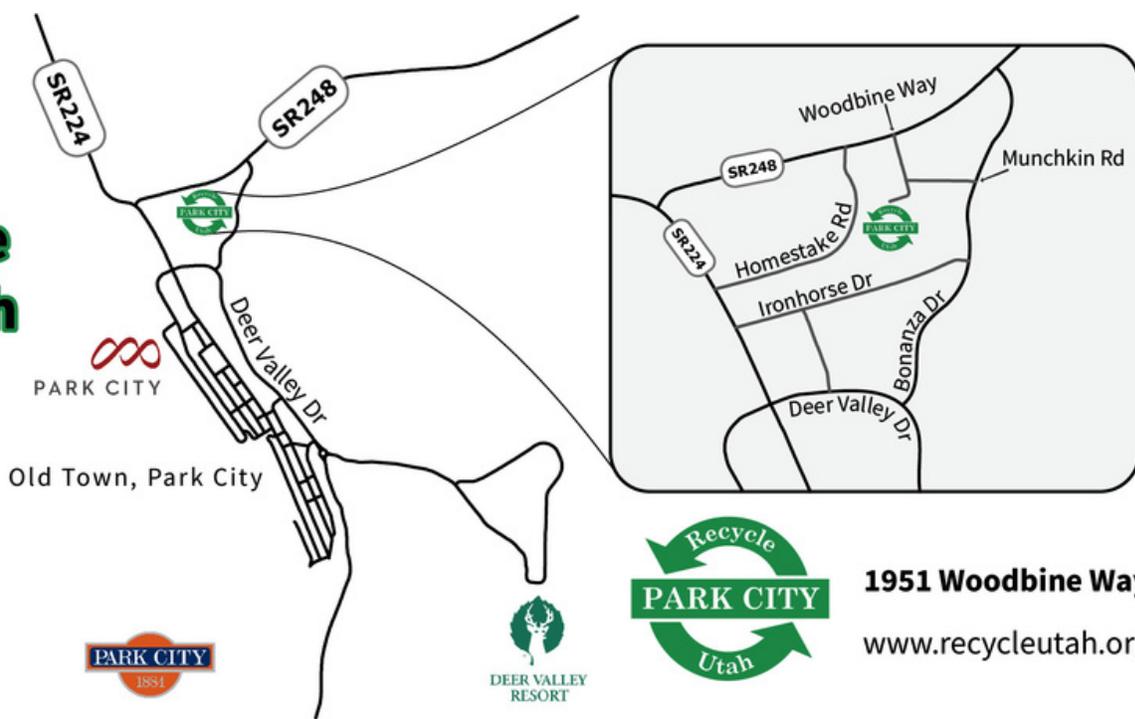

Park City, Utah is a community committed to sustainability. Our community has established the most ambitious climate goal in North America: net-zero carbon and 100% renewable electricity by 2030, with a more recent goal to include zero waste into the timeline. We are locally incorporating landfill diversion tactics such as "upstream" waste reduction, effective reuse and recycling.

This guide is meant to serve you in helping us to keep Park City reusable... we are honored to host you and hope you'll honor us in return by making a choice: simply reduce, reuse and recycle the items you bring into Park City.

Please help us to make Park City a place you'll return to and a place we'll remain.

Thank you, and enjoy!
The Park City Sustainability Department

Where is the Recycle Utah Center?

1951 Woodbine Way
