In September of 2016, Council gave staff the direction to ‘take the foot off the gas pedal’ with regards to Special Events. The goals of doing so included:

- Reduce event impacts on residential neighborhoods;
- Create a tool for evaluating and prioritizing events;
- Increase community participation in event debriefing; and
- Efficiently utilize City Resources

Staff worked on multiple items including increasing mitigation at events specifically around transportation, sustainability, community outreach and engagement, and streamlined/increased efficiencies in the Fee Reduction process among others.

In September of 2017, at the SEAC Study Session, council agreed with SEAC’s proposed goals – which include identifying and conveying community perspective of events, creating a statistically relevant community survey regarding events, and continue event debrief. Additionally, Council discussed that SEAC should focus on gaining resident feedback from the City (84060) and measure comfortable carrying capacity with broad residential community perspective. Council asked for SEAC to make a recommendation if events should be planned year round – including in the quieter seasons. Council also discussed that events should be focused on having meaning/fit in the community. The discussion also mentioned that impacts had been minimized over the past season and it would be interesting to see if attendance to events had declined.

**The Problem & the Opportunity**

Years ago Council directed staff to develop the event calendar as way to provide economic vitality in the shoulder seasons and build a year vibrant round community.

- The work of the City and many community partners/residents has created a successful year round resort destination and community – growing the economy, community, culture, and creating a sense of place.
- Special Events align w/ the Arts & Culture Top Priority & effectuates positive action in the Critical Priorities areas of Transportation, Energy and Social Equity.

- Special Events align with the [General Plan](#), specifically goals, objectives and strategies.:
  - Goal 10: Provide world class recreation and public infrastructure to host local, regional, national and international events that further Park City's role as a world class, multi-seasonal destination resort while maintaining balance with our sense of community.
  - Goal 11: Support the continued success of the multi-seasonal tourism economy while preserving the community character that adds to the visitor experience.
  - Goal 12: Foster diversity of jobs to provide greater economic stability and new opportunities for employment in Park City.
  - Goal 13: Park City will continue to grow as an arts and culture hub encouraging creative expression.
- As the event calendar has grown, so has the need to mitigate impacts and balance the event calendar to reduce 'event fatigue'.
- While staff continuously balances the event calendar, the cost of City Services and Level of Service (LOS) continue to increase, as well as, the economic (both direct and indirect revenues) and community/cultural opportunities.
- While staff has worked to mitigate event impacts, further culling/reducing the event calendar may create unintended consequences to community, cultural and economic benefits the City receives from events and will have negative implications on the non-profit community which makes up 95% of the event calendar.
- While staff has worked on proposed changes, there is no perfect solution. The changes will pose both new opportunities and challenges.
- The changes must be applied across the board to effectuate Council's objectives; they cannot be applied individually to events.
